Situational Interdependence Scale (SIS) – 10 Items

For each item, please think of the situation […] and indicate how strongly you agree or disagree with how the statement describes that situation. In each item "the other" refers to the person(s) in the situation […].

[…]: Insert a statement directing the respondents' attention to a past, present, or future situation.

1 = completely disagree   2 = slightly disagree   3 = neutral   4 = slightly agree   5 = completely agree

1 _____ How we behave now will have consequences for future outcomes.

2 _____ What each of us does in this situation affects the other.

3 _____ We can both obtain our preferred outcomes.

4 _____ Our future interactions are not affected by the outcomes of this situation.

5 _____ Whatever each of us does in this situation, our actions will not affect the other's outcomes.

6 _____ We both know what the other wants.

7 _____ Our preferred outcomes in this situation are conflicting.

8 _____ I don't think the other knows what I want.

For each item, please think of the situation […] and indicate how the statement describes yourself and "the other" in that situation. In each item "the other" refers to the person(s) in the situation […].

[…]: Insert a statement directing the respondents' attention to a past, present, or future situation.

1 = definitely the other   2 = maybe the other   3 = neutral   4 = maybe myself   5 = definitely myself

9 _____ Who do you feel had more power to determine their own outcome in this situation?

10 _____ Who has the least amount of influence on the outcomes of this situation?
